Town Attorney review required  
 Yes  No

Town Manager's Initials: JB

March 12, 2010

Esther Colon  
Town Manager  
Town of Lauderdale-By-The-Sea  
4501 Ocean Drive  
Lauderdale-By-The-Sea, FL 33308

**Subject: Chamber Roof Report**

The Town requested Chen and Associates investigate the requirements for replacing the roof of the Chamber of Commerce Building. The purpose of this report is to provide the background and costing information necessary for the Town to determine what actions to take to replace the roof.

**Background**

Chen and Associates performed a site visit to the Chamber building, had discussions with Town staff and collected plans for the Town. The site visit included an architect and structural engineer to assess the roofing requirements. Findings of the field visit are attached to the end of this report. Results of findings and discussions with Town can be summarized as follows:

- There are signs the roof tie down straps were previously stressed.
- A structural analysis of the roof may find deficiencies and identify reinforcement options.
- Reinforcing the structure to modern standards may be very expensive.

**Roof Materials**

The Town indicated there are two options for the type of roof materials:

- Standing Seam Metal Roof
- Clay Tile Roof

There are no major differences between these materials in terms of cost or installation time. The difference is aesthetical. There are examples in of both types of roof in the Town that can be used for comparison. The choice between materials is not an engineering decision.

**Options for Action**

There are four options for action:

- Option 1 – Do Nothing
- Option 2 – Simple Roof Replacement
- Option 3 – Replace Roof through RFP process
- Option 4 – Structural Analysis Report

*Option 1 – Do Nothing*

As is always the case, there is an option to leave the building as is. There is no cost to this option. The inhabitants must determine if they can live with the current condition.

*Option 2 – Simple Roof Replacement*

There is an option to have roofing companies provide the Town with quotes to replace the roof. Some quotes were already provided to the Town. The quotes were typically less than \$20,000 but had provisions for addressing rotted roof beams, which could drive the price higher during construction. The quotes received have not addressed the copula.

*"Providing quality, responsive and professional service to clients, peers and the public for 20 years"*

*Option 3 – Replace Roof through RFP process*

In order to replace the roof through an RFP process, standard engineering steps must be taken. They include

- Investigating the Building in more detail
- Prepare Plans and Specifications
- Bidding Analysis and Permitting
- Construction Administration

There are benefits of the RFP process. The Town will have a better level of understanding of the conditions the contractor will encounter and a defined cost. The town will also have strong technical documents that can be used to ensure the contract performs a high quality of work that will address the present building deficiencies.

The Town must decide on the roof material before this process commences. Bid documents will differ depending on the material used. Preparing plans for both will add to the engineering costs with no benefit, as construction costs will not differ significantly.

*Option 4 – Structural Analysis Report*

The previous Options 1 – 3 provided do not address the structural integrity of the building. There will be no guarantee that the structure roof will withstand a large hurricane. In order to determine the requirements, a structural analysis can be performed. A structural engineer will collect structural drawings, do a comprehensive site visit and produce a report with recommendations. Based on the results, a cost for reinforcing the structure can be determined. It must be noted that bringing the building to current standards will certainly be expensive and may be cost prohibitive.

**Budgeting**

For purposes of budgeting, a breakdown of estimated design and respective construction costs for the different options are provided below. The costs are estimates based on discussions and other information to be used for discussion purposes only.

Option	Engineering Cost	Construction Cost
Option 1 – Do Nothing	\$ -	\$ -
Option 2 – Simple Roof Replacement	\$ -	\$ 20,000 - 30,000
Option 3 – Replace Roof through RFP process	\$ 17,500	\$ 30,000 - 50,000
Option 4 – Structural Analysis Report	\$ 7,500	Possibly over \$100,000

These values are based on the above assumptions and do not constitute a final quote. This cost estimate is provided as a guideline only.

Please review this information and call me if you have any questions.

Respectfully submitted

CHEN AND ASSOCIATES  
 James Barton P.E.

**From:** Chris [mailto:chris@cpzarchitects.com]  
**Sent:** Monday, March 01, 2010 1:35 PM  
**To:** James H. Barton  
**Cc:** Lawrence DeRose; DonP@lauderdalebythesea-fl.gov  
**Subject:** RE: 1009 LBS Chamber - Roof Review

Don & James:

Larry DeRose and I reviewed the existing truss conditions at the Lauderdale By The Sea Chamber of Commerce. We observed the following conditions:

1. The existing roof truss hurricane tie down straps have a bow in the strap (see attached photo). It is the structural engineer's opinion that the roof was uplifted and the straps stressed due to past hurricanes. Therefore, if another hurricane hits and /or the building experiences high winds the roof will yield further, and in pulsating loading could fail or have excessive damage in the building.
2. The existing structural perimeter beam supports appear to be all wood frame with some mix of concrete walls. We cannot fully reinforce the structure. We would suggest that the City try to find the original drawings for the building. The building plaque indicates that the building was constructed in 1968. The city of Fort Lauderdale or Broward County may have documents on micro-film.
3. The overall truss system appears to be in good condition.
4. It was reported that the area experienced a hard rain last evening and the occupants did not report any roof leaks.
5. The interior of the cupola was not visible at this time.

You will need to coordinate with the City to determine how they want to proceed.

- A. They can proceed with reroofing and accept the existing roof strapping conditions as-is with the understanding that the roof could be damaging to the building or even fail in the future.
- B. Add 100% additional strapping to subsidize the existing strapping, only as a precautionary measure and understanding that there is no guarantee that this will do anything to mitigate the overall effect of a hurricane, since the overall structure was not reviewed.
- C. Have the structural engineer review the entire structure and evaluate what would be needed to be accomplished to secure the building from the foundation through the roof. After evaluation determine how to proceed.

We can limit our scope to just re-roofing if you would like. We just want to make sure that you and the City are aware of the existing conditions and make then make a decision.

Thanks

Re-Roof Proposal

**DATE:** February 9, 2010

Page 1 of 3

We are pleased to submit the following proposal for your consideration on the above referenced premises as follows. We agree to provide all labor, material, tools, equipment and proper insurance with excess liability of ten (10) million dollars.

**WORKSCOPE**

**BASE BID**

1. Remove existing tile and underlayment down to the plywood deck.
2. Haul away all the debris to a local dumpsite.
3. Inspect existing plywood deck and re-nail per Florida Building Code.
4. Furnish and install #30 Felt per Florida Building Code with tincaps and ring shank roofing nails.
5. Furnish and install Polyglass TU Plus Peel-N-Stick membrane per manufacturer's recommendations.
6. Furnish and install new lead flashings at plumbing vents.
7. Furnish and install new stainless steel all purpose vents if necessary.
8. Furnish and install new stainless steel eave drip, valley flashing, L flashing and stucco stop. If not deteriorated, re-use flashing at wall areas.
9. Furnish and install Hanson or Monier Cement roof tile adhered in foam and fastened per manufacturer's recommendations, Metro Dade County Notice of Acceptance and the Florida Building Code. Color as selected by owner from standard color chart.

**WARRANTY**

Five (5) year warranty on materials and labor by ARI Insurance, Inc.

Re-Roof Proposal

**DATE:** February 9, 2010

Page 2 of 3

QUOTATION

FOR THE SUM OF: ..... \$35,312.24 *T/R*  
(Thirty five thousand three hundred twelve dollars twenty four cents)

ALTERNATE #1

Furnish and install Englert 1300 Series .032 Aluminum metal panel roof system color per manufacturers standard color chart in lieu of tile roof system.

QUOTATION

FOR THE SUM OF: ..... ~~\$37,825.00~~  
(Thirty seven thousand eight hundred twenty five dollars)

Our work is done in a workmanlike manner by trained, qualified mechanics using the latest technical equipment for the job. Principals supervise all jobs and upon completion, also inspect and evaluate the premises and workmanship. As always, ADVANCED ROOFING, INC. is "Committed to Quality".

Extended guarantees are available with a maintenance program.

Every safety precaution will be taken to protect owner, pedestrian, property and landscaping. All work areas will be cleaned daily and equipment will be removed immediately upon completion of work.

**Notice to Owner:** Due to extreme volatility in asphalt, isocyanurate insulation and steel product prices, the price set forth in this proposal/contract applies only to orders for asphalt, isocyanurate insulation and steel products that are ordered and paid for within thirty (30) days of the date of this proposal/contract. All other orders shall be subject to change based upon change in the price of asphalt, isocyanurate insulation and steel related products charged to Advanced Roofing, Inc. **Advanced Roofing shall either pay for all materials within this time period, OR adjust the bid to accommodate their intended method of payment OR notify the Owner in writing when pay request is subject to an up-charge.**

**TERMS OF PAYMENT**

Progress payments based on percentage of completion using American Institute of Architects form.

- a. Per AIA 702 and 703 Schedule of Values/Progress Payments.
- b. 10% retainage to be paid upon delivery of permit final, warranties and Final Releases of Lien.

**ATTENTION PROPERTY OWNERS - DON'T JEOPARDIZE YOUR INSURANCE**

We are fully and properly insured with excess coverage of ten (10) million dollars. Proof of insurance will be sent upon request. It is in the best interest of the owner to make sure a contractor carries the amount of insurance as stated above and ask for proof.

Thank you for the opportunity to bid on this work. Should you have any questions or require any additional information, please do not hesitate to call.
