NEIGHBORHOOD DRAINAGE IMPROVEMENT PROJECT UNDERWAY ON WEST TRADEWINDS

Construction work is now underway on **West Tradewinds Avenue** as crews began installing new drainage along two blocks of the residential street.

Work is being done **Monday** through **Saturday** from **8AM** to **5PM**. The neighborhood drainage project, which started in late July, is expected to take 90 to 120 days to complete. The work is being done by **Miguel Lopez Jr. Inc.**

There will be occasional closures of West Tradewinds during construction. As an alternate route, motorists are advised to use **East Tradewinds Avenue**.

The \$146,000 exfiltration drainage project, approved by the **Town Commission**, will reduce flooding and runoff water pollution (West Tradewinds is adjacent to the **Intracoastal Waterway**). New drainage is being installed from South Tradewinds to Miramar Avenue.

If you have any questions or comments about the project, please call **Tiana Washington** in the **Municipal Services Department** at **954-776-5119**.
